1 ABOUT UNITY SUPERVISOR

Unity Supervisor is a Microsoft® Windows® based application designed for use with the BroadSoft Call Center Supervisor Standard or Premium service. Unity Supervisor provides a fully integrated hosted telephony environment, including allowing the user to join/leave call center queues to which they are assigned, change their ACD state and view personal and overall call center statistics and queue conditions.

1.1 Standard vs Enterprise Features

Unity Supervisor is available in Standard and Enterprise variants. The features available are as follows:

Unity Supervisor

Full call control, directory integration and service configuration [as outlined in the Unity Desktop user guide], plus:

- Remotely change Supervisors ACD state [available, unavailable, wrap-up]
- Allows the Supervisor to set threshold alerts against real time statistics for call centers

Unity Supervisor Enterprise

All Unity Supervisor features but also including:

- Callback CallerID capture of abandoned calls. Call center abandoned calls can be assigned to Agents for call back and reporting. Please note: this capability requires the customer to also be running Unity Wallboard and Unity Agent Enterprise.
- Unity Connect API integration with third party database applications.

The current version can be found in Help > About Unity

1.2 Naming Conventions for this Help

- a. Call Center instances are also referred to as Queues in this guide
- b. ACD calls mean incoming calls into the call center/queue
- c. BWKS means the BroadSoft BroadWorks platform

1.3 System Requirements

1.3.1 Windows PC Requirements

- a. Unity will require approx 20MB of hard drive space on the local machine
- b. By default the install directory is C:\Program Files (x86)\Unity Client
- c. Minimum computer spec: CPU: dual core 3Ghz. Ram: 4GB. Video Card: 256MB onboard RAM. As a general note, the requirements to run Unity Supervisor are considerably less than those required to run Windows
- d. Unity can be rolled out as an MSI file, which supports Active Directory group profiles
- e. Unity is only supported on Windows 7, Windows 8.1 and Windows 10
- f. Both 32 and 64-bit versions of Windows are supported. There are no special permissions required to install Unity

1.3.2 Internet & Firewall

Unity requires high-speed internet connectivity and access to the below locations, which may require firewall rules to be added on the customer premises:

- a. TCP port 2208 to im.unityclient.com
- b. TCP port 2208 to the VoIP platform OCI server
- c. HTTP/HTTPS access to portal.unityclient.com
- d. HTTP/HTTPS access to the VoIP platform XSI server [if call recording, visual voicemail or enhanced call center reports are used]

1.3.3 BroadWorks Platform Requirements

a. Unity Supervisor is supported on BWKS R17 SP4 and above

1.3.4 BroadWorks License and Service Requirements

Client Call Control

The Client Call Control service, assigned to the user, is mandatory as this is the service that allows Unity to integrate with the VoIP platform. If this service is not assigned, then the user will be alerted and Unity will not provide any functionality.

Internal calling line ID delivery & external calling line ID delivery

The Internal Calling Line ID Delivery and External Calling Line Id Delivery services should both be assigned as these services allow Unity to identify calls to/from other users in the business. If not assigned Unity will function, but the user will be prompted that this functionality will not be available.

Call transfer

The Call Transfer service is required in order to blind or announce transfer calls to internal and external numbers. Unity will alert the user if this service is not assigned.

Three-Way Call or N-Way Call

Either the Three-Way Calling or N-Way Calling service must be assigned to provide conferencing functionality, Unity will alert the user if neither service is assigned.

Basic Call Logs or Enhanced Call Logs

Either Basic Call Logs or Enhanced Call Logs must be assigned to the user in order to see dialled, received and missed calls. Unity will alert the user if neither service is assigned.

2 INITIAL SETUP

The first time Unity is started you will be prompted to enter the configuration details, as shown below. Unity can then retain the connection and authentication details for later use. The Login ID and Password will be assigned from your Service Provider.

| Broadworks Login Details | |
|--------------------------|--|
| Login ID | |
| | |
| Password | |
| | |
| Remember my login ID | |
| Remember my password | |
| | |

Next you will be prompted for the server address for your Service Provider. If this field is already populated do not change it. In most cases you can leave the Server Port as 2208. Leave the Unity Server Connection Details as those prefilled.

| Broadworks Server Connection Details |
|--|
| Server address |
| |
| Server port |
| 2208 |
| |
| |
| Unity Server Connection Details |
| Unity Server Connection Details Server address: |
| • |
| Server address: |
| Server address: im.unityclient.com |

Restart Unity Supervisor to begin.

2.1 Call Center Login Details

Once Unity has been restarted it will connect to the host BroadWorks system and populate all the Call Center Instance IDs for the call centers that the supervisor is a member of as shown below.

| U Services & Settings | | × |
|---|---|---|
| Services Settings Unity Settings Appearance Skin Contact Search Contact Search Contact Search | Specify call center authentication details. All login ids and passwords are case sensitive and each login id must include the domain. | |
| Computer/Phone Integration Clipboard Integration Dialing Rule Custom Directory Integration Configuration | Call Center Login Details | |
| Outlock Integration Outlock Integration Orker Ork | Bolts Sales Customer Support Nuts Sales Partner Support | |
| Call Centers | Alert me when a call center login fails | |
| | × Cancel ✓ OK | |

The password for each call center must be added in order to populate the call centers in the Personal Wallboard. Double click a call center to add the password. Where the password is the same for each call center click the "Apply to all queues without a password" box and restart. Unity will now login as the call center queues and you will see these begin to populate the Personal Wallboard.

| Call Center Login Details | |
|--|--|
| Service ID | |
| boltssales@drd.co.uk | |
| Password | |
| | |
| Login status | |
| The password has not been entered. | |
| | |
| Apply to all queues without a password | |

Ticking "Alert me when a call center login fails" will pop this dialogue box when Supervisor starts and cannot login successfully to a call center.

2.2 Call Center Login Default Password

If all call center passwords are the same, use the default password option. Enter the password for the call centers so that when a new call center is added in the future the supervisor doesn't have to enter the call center password as Unity will do this automatically. Please note that all call center passwords have to be the same for this option to work.

2.3 Selecting a Pre-Configured Template

User templates can only be created by an administrator to configure default settings for supervisors. ACD buttons, call center control, recording options and all other settings can be configured and saved as a template that can be easily assigned to all users.

Please see your Administrator for a separate guide on using Unity Templates.

2.4 Manual and Auto Updates

Unity can be configured to automatically update when a new version is available. Simply tick the box in settings>update as shown below.

| U Services & Settings | × |
|--|---|
| Services Settings Appearance Skin Contact Display Current Calls Computer/Phone Integration Clipboard Integration Cutook Integration Cutook Integration Cutook Integration Cutook Integration Cick To Dial Cick Keys Combinations Comversations Comversations Commands Statup Statup Circkate Cick Presence Cick Seasing & Presence Cick Seasing & Presence Cick Seasing Seasing Seasing Seasing Seasing Cick Presence Cick Seasing Seasing Seasing Seasing Cick Presence Cick Seasing Seasing Seasing Seasing Seasing Cick Presence Cick Seasing Seasing Seasing Seasing Cick Presence Cick Cick Dial Cick Presence Ci | Configure Unity to automatically update periodically. |

When a new version of Unity is available the user will be presented with a popup asking to restart Unity. Once Unity has restarted the latest version will be running. You can also configure how often Unity looks for updates under the auto update box.

To manually update Unity, click Perform manual update now and Unity will search for any new updates.

2.5 Rollback available

If rollback available is ticked in the Unity portal, then users can rollback to previous versions of Unity. Go to settings>update and the choose the desired version from the drop down menu.

| Rollback | |
|--------------------|----------|
| Versions available | |
| ~ | Rollback |

Once you've selected which version you want to rollback to click the green tick and the box below will appear.

| Unity | \times |
|---|----------|
| Are you sure you want to rollback to version 6.7.5.0? | |
| <u>Y</u> es <u>N</u> o | |

Click Yes and then click Ok.

3 UNITY SUPERVISOR INTERFACE OVERVIEW

Unity is split into six functional areas; ACD Buttons, Call Control buttons, Personal Wallboard, Active Call Window, Contacts [Busy Lamp Field and Instant Messages]. Contacts is a tab that can be toggled to display Call Logs, Abandoned Calls and the Voicemail tab.

| | ACD State | Call Con | ntrol Buttons | | | Company Logo | |

3.1 Resizing Unity Supervisor

Unity can be dragged from any corner to the required size. The Active Call Window resizes independently by dragging the border at the bottom of the list [where the lower red line is in the illustration above]. When Unity is closed, all current dimensions will be saved.

3.2 Maximising and Minimising

Unity can be maximised and minimised using the standard buttons in the top right hand corner of the application. When minimised, Unity appears in the system tray in the bottom right hand corner

of the desktop where the Unity icon ⁽¹⁾ will be displayed. To re-open Unity simply double click this icon, or right click and select Restore from the menu, as shown below.

| | Close | |
|---|------------------|---|
| | Restart | |
| | Restore | |
| ۰ | Settings | |
| | Contacts | |
| | Call Logs | |
| C | Call number | • |
| | Change my status | • |
| | ACD State | × |

3.3 Using Unity Supervisor from the System Tray

In its minimised state, Unity Supervisor can be configured to sit in the System Tray. This is in Settings [button] > Settings [tab] Appearance.

```
When minimised, place Unity in the 

system tray
taskbar
```

Right clicking the Unity icon **o** in the system tray allows the user to dial or redial, configure settings such as CommPilot Express Profiles, DND, Call Forward Always or Remote Office, or change their ACD state. Note: Only those services that are assigned to the user in BroadWorks will be displayed.

Selecting "Call number" will provide a list of the last 10 dialled numbers as illustrated below. "New number" will pop a call box where the user enters the desired number using their computer keyboard.

| 02455040525 | | | |
|-------------------------------------|----|------------------|---|
| 03456040626 | | | |
| 03457203040 | | | |
| 03459758758 | | Close | |
| 01268508018 | | Restart | |
| Steve Wardle | | Restore | |
| Chris Tutt | • | Settings | |
| Natalie Maines (Salesforce Contact) | ~ | Settings | |
| 001895454476 | | Contacts | |
| 00310000000 | | Call Logs | |
| Conference Bridge 1263 | S. | Call number | • |
| New number | | Change my status | • |
| | | ACD State | • |

3.4 Call Notification Preferences

Unity Supervisor can be configured to pop when a call is presented, or pop a "toast" summary notification above the system tray when a call is presented. Optionally, Supervisor can also perform auto-answer when using click-to-dial. If this is not selected then the IP phone will ring and the user will have to lift the handset to initiate the outbound call.

3.4.1 Show Remote Party Phone Number

This setting will configure to show the remote party number [if available], as shown below. This applies to both internal and external parties.

| From | То | Duration | Status | |
|------------|---------------------|----------|---------|--|
| Chris Tutt | Andrew Smith (0002) | 00:00 | Ringing | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

3.4.2 Override Contact Name Using Number

Unity can also perform a contact search based on the remote party number even if the name was provided by the Broadworks platform, this is especially useful when the name delivered through the PSTN is incorrect, for example in some cases this may always be "WIRELESS CALLER".

3.5 Summary Toast Notification

The summary notification is presented for hunt group, ACD and DID calls and can be used to route the call to voicemail or answer the call.

3.6 Browser Screen-Pop

The summary notification is also clickable and can be used to open the PC default browser to a preconfigured URL and append incoming call information, such as the phone number of the remote party. This feature can be used for screen popping CRM systems and other browser based applications. Further information on this feature is in a supplementary guide.

3.7 Appearance

In Settings [button] > Settings [tab] > Appearance, the user can change the behaviour of Unity.

Always show on top of all windows – Unity will always be on top Show missed call count in the call log tab – When enabled Unity will provide a count of the number of missed calls as below

Contacts Call Logs (2 Missed)

Show remote party phone number – This will show the phone number and the name [if matched] in the "From" field

3.8 Skins

In Settings [button] > Settings [tab] > Appearance > Skin, the user can change the look of Unity with preset Skins.

| Current Skin | Gradient Light Gray |
|--------------|---------------------|
| | Gradient Light Gray |
| | Gradient Gray |
| | Plain Gray |
| | Plain Light Gray |
| | Gradient Blue |
| | Plain Blue |

4 MAIN INTERFACE ELEMENTS

4.1 ACD State Buttons

ACD State buttons for setting the supervisor's availability to the call center. When clicking "Unavailable" the user will be presented a list of unavailable codes as configured in BroadWorks. Please note this is only available if either Call Center Agent Standard or Premium service is assigned to the user.

4.2 Call Control

Call Control buttons provide quick access to common telephone handling commands. Only services that are assigned to the user are displayed. For example, if Call Recording and Voicemail are not assigned then the buttons will not be displayed.

4.3 Active Call Window

This provides a list of all current calls and their state. For example, Ringing, Active or On Hold. The duration of the call is also displayed. This is from the moment the call was first placed and does not reset when a call is Held or Retrieved. Unity will mirror any call handling made on the user's IP phone. For example, if the call is placed on Hold on the handset, the user will show as being on Hold in the Active Call Window.

4.4 Contacts [Busy Lamp Field]

This panel will display up to 30 monitored users, displaying their Do Not Disturb [grey], Available [green], Engaged [red] or Ringing [orange] state as icons.

4.5 Call Logs

Toggling the bottom Contacts panel to Call Logs will display Missed Calls, Received Calls and Dialled Calls. Missed Calls will include both direct inward DID calls, ACD and Hunt Group calls. 20 numbers can be stored unless the user has Enhanced Call Logs service assigned. Call Logs can also be cleared, reloaded or exported with the icons at top right of the panel.

× 🖒 🗋

4.6 Abandoned Calls

In the Supervisor Enterprise version, a Supervisor can assign abandoned calls to an Agent for a call back. These will be listed in the "Abandoned Calls" tab. Right click these calls to assign them to an Agent or double click to make the outbound call. If the Supervisor is a member of BroadSoft premium call center using DNIS, then Unity will automatically change the outbound CLI to be that of the DNIS queue. Right click the call to mark as processed and remove from the abandoned call list.

| Contacts Call Logs Voicema | il Abandoned Calls | Agent Activity | | | | | |

| | | | | | Reset column widths | | | | right-clicking |
| | | | | ~ | Show gridlines | | - | - | |

In order for the Voicemail tab to appear, Supervisor must be configured for "Use unified messaging" and "Show visual voicemail tab" in Voicemail settings as below.

4.8 Personal Wallboard

If the Supervisor is not also an agent for the queue in BWKS, then they will not be able to Join/Leave or take calls for those queues. The Join/Leave status icon will show as grey and there will be no statistics in the "My Statistics" window as below.

When the user is also an agent

When the user is not an agent

4.9 Using Personal Wallboard

The Personal Wallboard will show current performance metrics for the call centers the Supervisor is assigned to. The statistics are broken down by "My Statistics" which shows the Supervisor's individual performance [assuming the supervisor is also an agent of the call center, as described above] and "Overall Queue Statistics" which will show the current conditions across the entire call center[s]. The
icon at the upper right hand corner of Personal Wallboard toggles between showing all call centers individually [Maximized View] or a summary of all call centers combined [Minimized View].

Maximized View

Note: Statistics shown in Personal Wallboard reset every 24 hours at midnight.

4.10 Locking in Minimized State

To disable the ability to maximise and minismise the Personal Wallboard, activate "Only display summary statistics" in Settings > Call Center > Statistics as below.

4.11 Staffed Ratio

Personal Wallboard in Unity Supervisor includes "Staffed Ratio", an additional stat that is not available in Unity Agent. For each queue, Staffed Ratio shows the total number of Agents that are available to take calls [i.e. that are Joined to the queue and have ACD state set to Available], out of the total number of Agents assigned to the queue in BWKS.

| Staffed Ratio |
|---------------|
| 1/6 |
| 1/9 |
| 2/15 |

4.12 Longest Wait Statistic

By default, Unity Supervisor displays the "Longest Wait Time" stat. This shows the wait time of the longest waiting call in the queue. If there are no calls in the queue this will be zero. This stat

can optionally be removed in Settings > Services > Columns > Call Center Columns. Click the statistics you want to remove then click the minus sign to remove it.

4.13 Statistics Refresh Timer

If the Client Call Control service is assigned to the queue in BWKS then the "Calls in Queue" stat [as shown in Personal Wallboard in Agent and Supervisor and Wallboard] will be a real-time stat. The "Longest Wait" stat is also real-time, in that it will start showing the wait duration in seconds for the longest waiting call in queue from the point it was displayed, so if there are no calls currently in queue then this statistic will be zero. All other statistics are polled from BWKS on a default 900 second timer. The timer can optionally be configured to a minimum level specified by the Service Provider with the minimum permissible duration being 60 seconds.

5 CALL CENTER AGENT FUNCTIONALITY

Unity Supervisor also allows the user to perform call center agent functionality such as changing ACD state, joining and leaving a queue and taking calls for that queue. This functionality is dependent on either the Call Center Agent Standard or Call Center Agent Premium service being assigned to the user, in which case the below functionality will automatically become available.

5.1 Changing ACD State

Clicking Unavailable, Available or Wrap-Up will change your availability for all queues you are a member of. This will not impact receiving inbound direct calls. The currently selected state will have the ACD state name in red text, as Available is in the below example.

5.1.1 Only Show One ACD Button

Unity Supervisor can optionally be configured in Settings > Incoming Calls > Call Center > Agent > ACD State to only display one ACD button, which will be the currently selected state. Left clicking will provide the other ACD options.

| rvices Settings | |
|---|--|
| Tricoming Calls Anonymous Call Rejection Call Forward Always Call Forward Busy Call Forward Busy Call Forward No Answer | Configure call center agent settings such as ACD state. |

5.1.2 Assigning Unavailable Codes

When the supervisor selects unavailable, any unavailable codes that have been configured in BroadWorks will appear.

Unavailable Code assignment with one ACD button:

Unavailable Code assignment with three ACD buttons:

5.1.3 Force Disposition Code

To assign a Disposition Code the supervisor right clicks in the Active Call Window. Unity can force the supervisor to enter a disposition code by setting their ACD state post-call to Wrap-Up ACD state. When they click Available they get a drop list of Disposition Codes. They must choose

one for the previous call before they can become Available. This feature is activated in Settings as below.

When Unity is configured to force the agent to assign a disposition code through a popup window which is automatically displayed to the user when the call is released.

The Unity UI will be disabled and the popup window will appear over all applications on the user's desktop. A timer can be specified which will display a count-down to the user, and will automatically close once the timer duration has elapsed. When they click Available they get a drop list of Disposition Codes. They must choose one for the previous call before they can become Available. This feature is activated in Settings as below.

| ervices Settings | |
|---|---|

5.1.4 Displaying ACD State Duration

The top bar in Unity Supervisor will show the current ACD state as below.

Unity Supervisor: Jenna Wimshurst - Unavailable - Paperwork (duration: 00:15)

This can optionally be configured to also display the ACD duration or the time that the ACD state was changed. This is configured in Settings > Agent > ACD State as below.

| ervices Settings | | |
|---|---|--|
| → Incoming Calls → Anonymous Call Rejection → Call Forward Always → Call Forward Busy → Call Forward No Answer → Call Conter | * | Configure call center agent settings such as ACD state. |

5.2 Using Personal Wallboard

The Personal Wallboard will show current performance metrics for the call centers the supervisor is assigned to. The statistics are broken down by "My Statistics" which shows the supervisor's individual performance and "Overall Queue Statistics" which will show the current conditions across the entire call center[s]. The < icon at the upper right hand corner of Personal Wallboard toggles between showing all call centers individually [maximized view] or a summary of all call centers combined [minimized view].

Note: Statistics shown in Personal Wallboard reset every 24 hours at midnight.

5.2.1 Locking in Minimized State

To disable the ability to maximise and minismise the Personal Wallboard, activate "Only display summary statistics" in Settings > Call Center > Statistics as below.

5.2.2 Configuring Statistics Columns in Personal Wallboard

The statistics shown in "My Statistics" and "Overall Queue Statistics" panels of the Personal Wallboard are configurable in Settings > Services > Call Center > Statistics > Columnns. Statistics can be added or removed with the - + buttons and the order they are displayed, from left to right in the Personal Wallboard can be changed with the arrows. Topmost is to the left.

| U Services & Settings | × | < |

| - Call Control | | | | | | |
| - Broadworks Anywhere | | | | | | |
| Call Transfer | | | | | | |
| - Call Park Retrieve | \sim | | | | | |

Selecting "Highlight non-zero values" will cause any value over 0 to be displayed in red. This has been activated for the "Total Calls" statistic below.

| Overall Que | ue Statistics | |
|-------------|----------------|-----------------------|
| Total Calls | Calls Answered | Total Missed Calls |
| 0 | 0 | 0 |
| 0 | 0 | 0 |
| 6 | 6 | 0 |
| 6 | 6 | 0 |

5.2.4 Configuring Alert Thresholds in Personal Wallboard

Double click any Statistic in Settings > Services > Call center > Statistics > Columns and tick "Set threshold alert values". This will display a table where corresponding values can be configured that will progressively change the statistic background colour green, yellow, red and black.

Some statistics allow a different threshold to be set per call center, for example important queues can have lower thresholds.

| Services Settings | | | | | | |
|--|---|--|---------------------|--------------|------------|-----------|
| Incoming Calls Anonymous Call Rejection Call Forward Always Call Forward Busy Call Forward No Answer | - | Specify which columns should be displaye also be set for many columns | d in the personal w | ralboard. Ti | nreshold v | alues car |
| ⊖- Call Center ⊖- Agent └─- ACD State | | Statistic to display NumberOfCallsAbandoned | • | | | |
| | | Column heading | | | | |
| - Reporting Abandoned Calls | | Abandoned | | | | |
| Comm Pilot Express | | Set threshold alert values | | | | |
| - Available: In Office | E | Call Center | | | | |
| - Available: Out Of Office - Busy | | All | 5 | 10 | 15 | 20 |
| Unavailable | | Bolts Sales | 1 | 2 | 5 | 10 |
| - Do Not Disturb | | Nuts Sales | | | | |
| - External Calling Line ID Delivery | | | | | | |
| Internal Calling Line ID Delivery | | | | | | |
| Simultaneous Ring Outgoing Calls | | | | | | |
| Calling Line ID Delivery Blocking | | | | | | |
| - Call Control | | | | | | |
| Broadworks Anywhere | | | | | | |
| Broadworks Mobility | | | | | | |
| Call Transfer | | | | | | |
| Call Park Retrieve Call Recording | | | | | | |
| | | | | | | |

Double click an entry in the list to set overall threshold values or those for a specific call center. In the example below statistics columns have been added, some have been renamed from the default and threshold alerts have been configured.

| Calls In Queue | Total Calls | Calls Answered | Total Missed Calls | Average Talk Time | Missed % | Busy Overflows |
|----------------|-------------|----------------|-----------------------|----------------------|----------|----------------|
| 0 | 0 | 0 | 0 | 00:00 | 0.00 | 0 |
| 0 | 2 | 2 | 0 | 01:31 | 0.00 | 0 |
| 0 | 35 | 33 | 2 | 02:58 | 5.71 | 0 |
| 0 | 6 | 6 | 0 | 02:25 | 0.00 | 0 |
| 0 | 43 | 41 | 2 | 01:43 | 1.43 | 0 |

5.3 Joining & Leaving Queues

Right click any queue in the Personal Wallboard to toggle between Join and Leave queue. Queues that you are joined to have a green icon next to them. A red icon indicates that you are not joined to that queue.

5.4 Receiving ACD Calls

Inbound ACD calls will display the call center name, as configured in BroadWorks, in the "To" field. The "From" field will display the incoming CallerID [if not withheld] or the name of the caller if that can be matched from the Directory. Answer the call by lifting the IP phone handset, clicking Answer/Release call control button or double clicking the call in the Active Call Window.

| Call | Natalie Ma | aines (Sale | sforce Co | ontact) | Bolts Sa | les | | | 00:00 | | Ringing | | |

Hang up the IP phone handset or click Release 📀 to end the call.

5.5 Using Disposition Codes

Unity will expose ACD Disposition Codes as configured in BroadWorks, to supervisors within the Active Call Window. The user can enter one or more Disposition Codes by right clicking the active call and selecting from the context menu. Disposition Codes can be entered while the call is active, or immediately after, when the call has ended and before another call is answered. Only Disposition Codes configured for the queue that the supervisor has answered are displayed.

| From | | То | Duration | | | Status | | | Notes |
|------------------------------------|---|-------------------------------|------------------------------|---|--------|-------------------|-------|-----------------|----------------------|
| Natalie Maines (Salesforce Contact |) | Bolts Sales | 00:18 | | | Active - Not reco | rding | | |

| | | | | | New Custome | er |

5.6 Auto Answer

Unity Supervisor optionally allows ACD calls to auto-answer when the supervisor is in the "Available" state. This is toggled on/off in Settings > Incoming Calls > Agent.

5.7 Supervisor Escalation

Unity Call Center Supervisor facilitates the BroadWorks call center escalation feature by allowing both standard and emergency call escalation. Both types of escalation can only be performed on call center calls and both inbound and outbound [DNIS] calls are supported. In either case, a user can only escalate a call to a supervisor if they are currently supervising them in BroadWorks. If this is not the case the user will be told [through the phone] that the supervisor is not a valid supervisor.

5.7.1 Standard Escalation

Standard escalation is used when an agent needs to be given information or instruction from the supervisor without conferencing in the remote party. Typically, the agent will release the call to the supervisor and replay the information to the remote party. Unity allows the call to be escalated to a specific supervisor or to the first supervisor that is available. The Agent's Unity client will automatically place the ACD call on hold, then dial the extension of the supervisor as an escalated call. This call will then appear as an escalated call in all center reports. Standard call policy/routing rules will be used when calling the supervisor, such as DND, call forwarding and hoteling guest etc. At any time, the agent can release the escalated call, or can transfer or conference both calls together if required.

5.7.2 Emergency Escalation

Emergency escalation is used to immediately conference a supervisor into the call with the remote party, therefore it relies on either the 3-Way or N-Way Calling user service being assigned. When performing an emergency escalation, Unity will place any active calls on hold then dial the selected supervisor, or the first supervisor that is available.

5.7.3 Escalation via Active Call Window

To perform escalation, the agent right-clicks the call in the active call window, then either chooses the supervisor to escalate the call to:

Or escalates the call to the first available supervisor.

| From | То | | | | | |
|-------------------------|----|---|---|--|--|--|
| Natalie Maines (Salesf | | Assign call to account code | , | | | |
| | + | Add number to personal directory | | | | |

| Name | | Supervisors | , | | | |
| | | Assign disposition code | , | | | |
| | | Reset column widths | | | | |
| | ~ | Show gridlines | | | | |

5.7.4 Escalation via Personal Wallboard

The supervisor can escalate a call center call by using the context menu displayed when rightclicking on the call center in the personal wallboard, as shown below. This assumes that Unity has logged in as the call center and is displaying statistics in the personal wallboard.

| Name | | Total Calls | Answered Calls | Missed Calls | Average Talk Time | Total Talk 1 | Time | Total Staffed Time | Average Agents Talking | Total |
|-------------|---|--|----------------|--------------|-------------------------|--------------|------|------------------------|---------------------------|-------|

| | | Supervisors | | • | Amy Earl | • | | | | |
| | | Agents | | • | Chris Tutt | • | | Call/escalate | | |
| | | Instant message all super | vised agents | | Dashboard User | • | | Instant conference/ | emergency escalate | |
| | | Modify supervised agent | list | | Conference Phor Ed | ne 🔸 | e | Transfer call to exter | nsion | |
| | | Activate forced forwardin | ng | | Gopikrishnan V | | m | Instant message | | |
| | ~ | Show gridlines | | | lain Sin | • | | | | |
| | | | | | Sally Jones | • | | | | |
| | | | | | Sebin Joseph | • | | | | |
| | | | | | Steve Tutt | • | | | | |
| | | | | | Steve Wardle | • | | | | |

Please note that if the supervisor right-clicks on a different call center in the personal wallboard [to the one that the call was routed through] then the call escalation options will not be displayed.

5.8 Activating Outbound DNIS

If the supervisor is a member of BroadWorks call center premium queues, and the DNIS capability has been configured, then the user can select an outbound DNIS which will determine which outbound CallerID is presented when the supervisor makes external outbound calls. Right click the Dial icon and mouse over "Change Outbound Number" at the bottom [the numbers above are a clickable list of last 10 numbers for redial]. The outbound DNIS that are available are presented. The currently selected outbound DNIS is ticked. This will affect all outbound calls until the outbound DNIS setting is changed, or set to none.

5.9 Personal Statistical Reports

Unity Supervisor provides access to the following agent reports (refer to section 6.8 for Supervisor reports):

| Agent Activity Detail Report | Agent Call Report |
|------------------------------|--------------------------------|
| Agent Activity Report | Agent Duration By Skill Report |
| Agent Call By Skill Report | Agent Duration Report |
| Agent Call Detail Report | Agent Sign In Sign Out Report |

To access these reports, click the Reports button Viewer from the menu. Specify the reporting period, click Tools > Call Centre > Report Viewer. From the Report Viewer interface [shown below] select the desired report and reporting period.

5.10 Pre-configuration of ACD State

Unity Supervisor offers a cascading hierarchy of supervisor availability settings that control the supervisor's join and ACD status depending on the status of the host computer. This is in Settings > Services > Incoming Calls > Agent.

In additon, the ACD state can be configured for computer startup and unlock state, postcall state and desktop locked state.

| U Services & Settings | × |
|--|--|
| Services Settings | |
| Incoming Cals Anonymous Cal Rejection Gal Forward Always Cal Forward Busy Cal Forward No Answer Cal Center | Configure call center agent settings such as ACD state. |

6 SUPERVISOR FUNCTIONALITY

6.1 Remotely Changing Agent State

The supervisor can change the agent's availability to the call center either from the Personal Wallboard, Tools menu or Agent Activity tab. The actions that are available are forcing the agent to Join or Leave specific queues and changing their ACD state, including the unavailable reason code if applicable. The supervisor can also specify an Unavailable code when selecting this state and Call or Instant Message the Agent from the drop list.

When providing the option to change a monitored agent's ACD state or joined status, Unity will show if the agent is currently joined to the queue and what the current ACD state is, as shown below.

| 0 | Join Queue Leave Queue | |
|---|---------------------------------------|--|
| | Sign In Available | |
| | Unavailable 🕨 🕨 | Awaiting PCI Payment |
| | Wrap-Up | Clearing Tickets |
| ~ | Sign-Out | Comfort Break |
| C | Call extension | Lunch |
| ø | Instant message | Paperwork Technical Support & Testing |
| ~ | Reset column widths Show gridlines | Training WebChat |

6.2 Remotely Changing Agent State from Personal Wallboard

Right clicking any queue in the Personal Wallboard will present a drop list of options. Hover over "Agents" to see a list of all agents assigned to the selected queue. Hovering over the agent in turn will present the supervisor options to Join/Leave the agent from the queue and change their ACD State.

6.3 Remotely Changing Agent State from Agent Activity Tab

To display an agent's queue membership and their current status, click the "Agents" radio button in the Agent Activity tab and select from the drop list. Right clicking an individual queue allows the supervisor to Join/Leave the agent to/from each queue or to change their ACD state for all queues that the agent is a member of.

| Con | tacts Call Logs | oicemail Abandoned Calls Agent Activity | |
|-----|-----------------|---|-----------------------|
| | Agent Steve Tut | ~ O Queues | Agents |
| | Name | Status | ACD State |
| 0 | Bolts Sales | | Unavailable - WebChat |
| 8 | Customer Suppo | | |
| 0 | Nuts Sales | 🔵 Join Queue | |
| 8 | Partner Support | Leave Queue | |
| | | Sign In | |
| | | Available | |
| | | Unavailable 🕨 | |

6.3.1 View Satistics and Set Thresholds Against Agents

All statistics in the Agent Activity tab are configurable and allow thresholds to be set against them. To add and remove statistics in the Agent Activity tab go to Settings>Statistics>Columns>Agent Activity. To set thresholds against a statistic, double click it and set the values.

| U Services & Settings | | × |

6.3.2 Changing The Agent's Icon In The Agent Activity Tab

The Agent's icon in the Agent Activity tab can be based on a range of states, for example, JoinedState which displays either red or green to represent whether the Agent is joined to the Call Center or not.

| Contacts Call Logs Voi | cemail Abandoned Calls Age | ent Activity |
|------------------------|----------------------------|---|
| Queue Bolts Sales | ~ | Queues O Agents |
| Name | Status | ACD State |

| | × Cancel ✓ OK | |

6.4 Remotely Changing Agent State from Tools Menu

Clicking Tools > Call Centers will list the call centers currently being supervised. Mouse over a call center > Agents to change the agent's ACD state.

6.5 Threshold Alerts

Thresholds allow the supervisor to configure performance triggers against various parameters for all the queues they are supervising. These will not affect the call handling and construction of the queue, but are designed as a warning that the call center is experiencing abnormal behaviour and allowing the supervisor to take remedial action.

6.5.1 Configuring Thresholds

Click Settings [button] > Services [tab] > Statistics> Columns > Call Center Columns – double click the statics (e.g. total calls) to set thresholds. Different thresholds can be set for all queue parameters for different call centers, or all call centers can have the same threshold. Double click the boxes to populate the threshold value. Tick ok to confirm.

| ervices Settings | | | |

Audio and visual threshold alerts will only be activated if the applicable checkbox is checked in the threshold, so for example you can configure Unity to only play an alert if the red threshold value is reached.

Where the "Send email to" field has been populated, Supervisor will send an alert by email as below.

6.6 Silent Monitoring

Allows the supervisor to silently monitor the next call or calls taken by a specified agent. Requires the Call Center Monitoring service assigned to the Supervisor in BWKS. Requires Call Center Agent Premium call center.

To activate Silent Monitoring, right click the call center queue in Personal Wallboard > select the agent > select Next Call Only or All Calls.

Silent Monitoring Warning Tone

The supervisor can optionally play the agent a tone to alert them that they are being monitored. This can be toggled on/off in Settings [button] > Services [tab] > Supervisor.

| Services Settings | | | |

6.8 Running Reports

Unity Supervisor provides access to the real-time and historical reports provided by the BWKS DBS reporting server. The information in these reports is entirely produced by BWKS. To access reports click Tools > Call Centre > Report Viewer.

| To | Call centers | • | Report Viewer | |
|----|--------------|---|------------------|-----|

6.9 Adding Agents to Monitored Agents List

By default, Unity Supervisor will take use of the list of supervised agents from BWKS. To monitor a specific subset of the total agents, go to Settings [button] > Settings [tab] > Supervisor and uncheck "Automatically add all agents to my supervised agent list" and restart Unity.

| Service | es & Settings | | > |
|-------------|--|---|--|
| Services | Settings | | |
| A C C | ming Calls nonymous Call Rejection all Forward Always all Forward Busy all Forward No Answer | ^ | Configure call center supervisor settings. Individual alerts can also be set when overall queue thresholds are reached. The Client Call Control service must be assigned to the call center in order to show queued calls. |
| | all Center Agent | | Automatically add all agents to my supervised agent list |
| E | ACD State Supervisor | | Show queued calls in my current call list |
| E | Statistics | | Only include my supervised agents in the staffed ratio Agent activity image based on |
| | - Threshold Alerts Reporting Abandoned Calls | | AvailabilityToTakeCalls ~ |

Right click the call center queue in Personal Wallboard, select "Modify supervised agent list" and add the agents you want to supervise.

6.10 Supervised Agents in Staffed Ratio Statistic

The supervisor can optionally configure the "Staffed Ratio" statistic so that it only shows agents that are being supervised. In Settings [button] > Settings [tab] > Supervisor – check "Only included my supervised agents in the staffed ratio". This means that even if there are hundreds of other agents available in the queue, the supervisor will only see how many of the agents they supervise are available in each queue through the staffed ratio statistic.

7 CALL CONTROL

All calls are managed through the call control buttons at the top of the application. These buttons will change depending on the state of the selected call, or the only call if there is only one call in

the Active Call Window. For example, the Answer/Release

buttons toggle as only one of these options will be valid at any time. When an inbound call is ringing Answer becomes the valid option. Once the call is active the icon will toggle to Release as hanging up is the only valid option.

7.1 Making a Call

7.1.1 Using the Dial Window

Click the Dial button ⁽ⁱ⁾ to bring up the Dial dialogue box, as shown below. Using the computer keypad enter the desired number and press Enter or click OK to make the call. The desk telephone will default to using hands-free speakerphone. If the telephone does not support speakerphone, you will need to lift the handset when the call is answered.

| Dial | | | × |
|--------|----------|------|---|
| Number | | | |
| | × Cancel | 🗸 ОК | |

7.1.2 Using the Contacts Panel

Double click a user icon or right click and select "Call extension"

7.1.3 Drag and Drop

Right click a user icon on the Contacts panel and drag the icon up to the Active Call Window. This will open a call to that user. Calls can also be dragged from the Active Call Window onto a call center to perform a blind transfer. Calls dragged onto a monitored user will either be blind transferred or present options depending on the user preferences in Settings and whether the monitored user is engaged or not. For engaged contacts, park, camp-on and transfer to voicemail are available. For available contacts transfer to extension, transfer to mobile, transfer to voicemail or present call hold, camp on and transfer are available.

7.1.4 Using Directory Search

Enter the search field in the Contacts panel to dynamically search all internal users and speed dials. Either right click and select "Call extension" or right-click and drag the icon into the Active Call Window to make the call.

7.1.4 Dialling from the clipboard

Any number that is copied to the Windows clipboard, (highlight the telephone number, right click, then clicking copy) this will cause a popup toast above the system tray with the option to call the

number. Click the toast notification to make the call. This feature can be enabled/disabled in Settings. When a number is copied to the clipboard, Unity can show a prompt to the user which appears over all applications, rather than show a toast notification. This can be configured through Settings>Settings tab>Clipboard Integration.

7.2 Answer a Call

When Unity displays an inbound call, click the Answer icon or double click the call in the Active Call Window to answer the call. Your desk telephone will now be on hands-free speakerphone, if it supports this feature with Unity. If there is an active call in progress, you will need to click the new inbound call in the Current Call List before clicking Answer, this will automatically place the first call on Hold. Please note that answering a call by lifting the handset on the desk phone will have the same effect as clicking Answer in Unity.

7.3 End a Call

Click the Release button ⁽²⁾ to end the currently selected call. If there are multiple calls in the current call list, make sure you select the right call before clicking Release.

Note: Replacing the telephone handset will also end the call, which will then be removed from the Active Call Window.

7.3 Redial

You can also right-click the Dial button to see a list of the last 10 dialled numbers. Simply click on an entry to dial the party, as shown below.

7.4 Send Call to Voicemail

To send an inbound caller directly to your voicemail click the Voicemail button \bigcirc . Please note that if voicemail is not assigned or is disabled, the button will still be visible but inactive.

7.4.1 Retrieving Voicemail Messages via VoiceMail Button

When no calls are currently selected, clicking the Voicemail button will dial the user into their voicemail. The phone will default to hands-free speaker phone if it has this capability.

7.4.2 Retrieving Voicemail Messages via Voicemail tab

Clicking into the Voicemail tab will display a list of voice messages with the most recent at the top. Double click an entry to play through the PC's default media player. Right click to save locally or delete. In order for the Voicemail tab to appear, Supervisor must be configured for "Use unified messaging" and "Show visual voicemail tab" in Voicemail settings as below.

7.5 Transferring a Call

There are two ways to transfer a call; Announced Transfer, where you introduce the call to the receiving party before putting the call through, and Blind Transfer, where you transfer the caller directly to a recipient without introducing the call. Please note that calls can be transferred both to internal users and external contacts.

7.5.1 Announced Transfer

Receive and answer an inbound call. Make a new call to the desired destination extension or number as described Make a Call above. This will automatically place the first caller on Hold and

will open a new call in the Active Call Window. Once the called party answers, click Transfer and select the context menu option to transfer both calling parties together. Both calls will now disappear from the Active Call Window.

Note: The user is not limiting to transferring received calls. They can make two outbound calls and then use transfer to "bridge" them together.

Calls can also be transferred together by dragging one call on top of another within the Active Call List.

Example 1 - Transfer with two live calls

| | | | nsfer 034560406 | | to 01268508 | 018 | |

7.5.1.1 Warm Transfer

Unity Supervisor allows you to warm transfer a call by right clicking the user you want to transfer the call to and selecting "warm transfer" from the context menu. This will then put the original caller on hold and dial the selected number. When ready, click the transfer button in the call center control options panel and the two calls will be transferred, automatically disappearing from your active call window.

| 0 | Tracey | | Call extension |
|----|---------|----|---------------------------------|
| 0 | Steve V | 6 | Call extension |
| 0 | Steve 1 | C. | Transfer call to extension |
| Q, | Peter L | | Warm transfer call to extension |
| 0 | Paul D | | T () () |
| 0 | Lewis | | Transfer to voicemail |

7.5.2 Blind Transfer

7.5.2.1 Using Contacts Panel Drag and Drop

Unity Supervisor can be configured to automatically blind transfer a call by dragging the call from the Active Call Window and dropping it on a user icon or number icon in the Contacts panel, or dropping it onto a call center queue [if supervisor is configured as an supervisor with call center queues].

Note: Unity can be configured to display a menu when dropping a call onto a user icon. If no menu options are selected the blind transfer is performed. If menu options are selected, click "Transfer call to extension" to also perform blind transfer. For more information on Drag & drop refer to section 9.

7.5.2.2 Using Transfer Button

Once on a call click the Transfer call control button \bigcirc . In the Transfer window enter the destination and click OK.

7.5.2.3 Using Right Click

While on an active call right click the recipient icon or number in the Contacts panel or Search.

Select "Transfer call to extension" to blind transfer the call.

| Nar | ne | Phone |
|-----|------------|---------------------------------|
| 0 | Ala: | Call extension |
| 0 | Chr 🙁 | Transfer call to extension |
| 0 | Cin | Warm transfer call to extension |
| 0 | Col Dav | Transfer to voicemail |
| 0 | Dea | Park call on extension |
| 0 | Ed | View user details |
| 0 | Lee | |

7.5.3 Transfer to Voicemail

The option to Transfer to voicemail is valid only for internal company users that have Voicemail assigned and activated.

7.5.3.1 Using Contacts Panel Right Click - Voicemail

While on an active call, right click a user in the User Status list and select "Transfer to voicemail". This will send the selected call directly to the destination extension voicemail without introducing ringing.

| 0 | Trace | C | Call extension |
|----|--------|----|---------------------------------|
| 0 | Steve | | |
| 0 | Steve | (° | Transfer call to extension |
| Q. | Peter | | Warm transfer call to extension |
| Ø | Paul [| | Transfer to voicemail |
| 0 | Lewis | | Transfer to voicemail |
| 0 | Lee H | | Park call on extension |
| | - 1 TI | | |

7.5.3.2 Using Drag and Drop

If configured, Unity will display "Transfer to voicemail" in the list when an active call is dragged onto the destination user icon in the Contacts panel. For more information, refer to section 9.

| 0 | Tracey Se | nates | 3 | 02082881262 | |
|----|-----------|-------|------------------------|--------------|--|
| 0 | Steve W | e | Transfer call | to extension | |
| 0 | Steve Tu | | Transfer to v | oicemail | |
| Q. | Peter La | | | | |
| 0 | Paul Dev | | Park call on extension | | |

7.5.4 Transfer to Mobile

If the destination user has a mobile number entered as part of their profile in BroadWorks, you have the option to right click and select either Dial Mobile [to perform an announced transfer] or Transfer Call to Mobile [to perform blind transfer].

7.5.4.1 Using Contacts Panel Right Click - Mobile

Right click the desired user in the Contacts panel. To announce the call, click Dial Mobile. Once

the recipient answers, click Transfer () and select the context menu option to transfer the calls together. To blind transfer the call without introduction click Transfer call to mobile.

7.5.4.2 Using Drag and Drop

If configured, Unity will display "Transfer to mobile" in the list when an active call is dragged onto the destination user icon in the Contacts panel. For more information, refer to section 9.

7.7 Call Hold/Retrieve

The Hold/Retrieve uncertainty function toggles depending on the status of the currently selected call. Hold is only available for an active call while Retrieve is only a valid option for a call currently on Hold. When a call is on Hold, the blue Hold icon is shown in miniature to the left of the call in the Active Call Window and the status is On Hold, as shown below.

| | From | То | Duration | Status |
|---|-----------------|------------|----------|---------|
| 0 | Jenna Wimshurst | Sasha Gorb | 00:04 | On hold |
| | | | | |
| | | | | |

7.7.1 Placing a Call on Hold

To place a current active call on Hold, press the red Hold button. ^(III) The call status will now show as on hold in the Current Call List and there will be an On Hold icon alongside the call.

7.7.2 Retrieving a Held Call

Click the held call in the Current Call List to select it. Click the Retrieve button \bigcirc to take the call off hold, you can also double click the call to retrieve it. Please note that any other active calls will be placed on hold before the selected call is retrieved, meaning you can toggle between call by double-clicking them in the Active Call Window.

7.7 Conference Calling

A conference call can be established with any combination of internal and external numbers. The total number of parties that can be supported is determined by service assignment. The Three-Way Calling user service supports conference calls with two other parties only while the N-Way Calling user service supports conference calls with more participants.

7.7.1 Starting a Conference Call

Once an active call is established [that you have either made or received] call a second person.

You can do this by clicking the Dial button ^(III) or double clicking a user in the Contacts panel or Search, or Call Log lists. Making this call will automatically place the first caller on Hold.

Once the second party has answered the call, click the Conference button ⁴³ and a new conference will be created between you and the other two parties. This is represented in the Active Call Window as shown below:

| | From | То | Duration | Status |
|------|-----------------|-----------------|----------|-----------------------------------|
| 523 | Sasha Gorb | Jenna Wimshurst | 00:15 | Active (conference)/Not recording |
| 523. | Jenna Wimshurst | 01268508018 | 00:02 | Active (conference)/Not recording |
| | | | | |

Selecting either call and clicking Hold will place the conference call on hold, during which time the other callers can still talk to each other.

| From | То | Duration | Status |
|-----------------|-----------------|----------|----------------------|
| Sasha Gorb | Jenna Wimshurst | 00:36 | On hold (conference) |
| Jenna Wimshurst | 01268508018 | 00:23 | On hold (conference) |

7.7.1.1 Adding Multiple Parties

Once you have a conference established you can add additional parties by calling them. This will

place the existing conference on hold. Now click the Conference button . You will be prompted to add the new party to the existing conference as below.

| | From | | То | Duration | Status |
|-----|----------------------------------|-------|--|----------|----------------------|
| 0 | Sasha Gorb | | Jenna Wimshurst | 01:30 | On hold (conference) |
| 0 | Jenna Wimshurst | | 01268508018 | 01:17 | On hold (conference) |
| | Jenna Wimshurst | | 03456040626 | 00:05 | Active/Not recording |
| | ntacts Call Logs Voice Search | Unity | imes Do you want to add 03456040626 to the conference? | | |
| Ma | me | | Yes No | | |
| ING | | 1 | | | |

Please note that conference calls can be started with any two remote calls, regardless of the direction of either call or if the number is internal or external [for example between two mobile calls].

7.7.2 Ending a Conference Call

To remove a caller from the conference call but continue speaking to the other caller[s], simply

select the call to release in the Active Call Window and click the Release button as you would normally. This will release the selected party and will show only the remaining party[s] in the Active Call Window.

To end a conference call but leave the two remote parties in conversation with each other, click the Transfer button and select the "leave conference" menu option, as shown below.

7.7.3 Conference Bridge Integration

Unity allows the user to right click the Conference button to view or copy details of their "reservation less" conference bridge(s), or to call a bridge as a moderator. If this has been configured in BroadWorks.

7.8 Call Recording

If the Call Recording User service is assigned then the user may be able to manage call recording, although this depends on the functionality offered by the VoIP platform and service configuration parameters. If this service isn't assigned, then the Call Recording button is not displayed in the main window.

7.8.1 Changing the Call Recording Option

Right-click the Recording button to select the call recording option, as below. Please note that depending on permissions this may not be available.

Call Recording options are:

| Option | Description |
|--------------|---|
| Always | Calls are automatically recorded from the beginning of the call. There |
| | is no option to pause or stop recording. |
| On Demand | Calls are not automatically recorded from the start, but recording can |
| | be started at any time during the call in which case the entire call will |
| | be recorded. Stop and pause are not available with this option. |
| Never | Calls are never recorded and recording cannot be started while a call |
| | is in progress. |
| Always with | All calls are automatically recorded from the beginning of the call, but |
| Pause/Resume | recording can be paused and resumed, which is especially important |
| | when taking credit card details over the phone [that need to be |
| | omitted]. This will still result in a single recording for the call, |
| | regardless of how many times it was paused and resumed. |

| On Demand with User | Calls are not automatically recorded from the start, but recording can |
|---------------------|--|
| Initiated Start | be started at any time. However, any conversation before the |
| | recording was started will not be included in the recording. Recording |
| | can be paused and resumed, which will result in different recordings |
| | being created for a single call. |

7.8.2 Controlling Call Recording

You can start, stop, pause and resume call recording depending on the Call Recording Option currently selected. Left-click the Recording button to manage recording for the selected call in the Active Call Window will toggle the option depending on the current recording state. The call

recording button will change 🥙 😲 to indicate this. When set as Always with Pause/Resume,

the user can left click to Pause/Resume and the button will toggle as Resume [recording]

Pause 💛.

When set as "On Demand With User initiated Start" left clicking the call recording button presents the following menu to allow the user to control the call recording behaviour. Click the Recording button again to continue/restart recording the call.

The Active Call List will also indicate the recording state of all calls, as shown below.

| From | То | Duration | Status | |
|------------|----------------------|----------|-------------------------|--|
| Chris Tutt | Barry Simpson (0003) | 00:19 | Active/Recording paused | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

8 ACTIVE CALL WINDOW

The Active Call Window gives visual representation of the status of all calls the user receives or is currently managing.

8.1 Window Layout

| | From | То | Duration | Status |
|---|-----------------|-------------|----------|---------|
| 0 | Jenna Wimshurst | 03456040626 | 00:18 | On hold |
| | Jenna Wimshurst | Sasha Gorb | 00:00 | Ringing |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

From – This field will display the incoming CallerID or the name if it is matched in the Group/Enterprise directory, Personal Contacts or Outlook Contacts.

To – This field displays the name of the user, hunt group or call center that has been called ensuring the call can be answered appropriately.

Duration – This displays the total time elapsed since the call was first answered. The timer does not restart when the call is placed on hold.

Status – This shows the Ringing/Active on On Hold status of each call.

Users can optionally see all calls in queue for the Call Centers they are joined to, as shown below. This is configured in Settings>Supervisor>Show queued calls in my current call list.

| From | То | Duration | Status |
|-------------------|-------------|----------|----------------------|
| Hot Desk 3 - 9103 | Bolts Sales | 01:48 | Queued at position 1 |
| Charlotte Quartly | Bolts Sales | 01:25 | Queued at position 2 |
| | | | |
| | | | |

8.2 Managing Multiple Calls

To manage a particular call, first select it by clicking it in the Current Call List. If there is only one call in the list it will be selected automatically. You can then use the call control buttons to perform different actions on the call. There is no limit to the number of calls that can be displayed in the Current Call List, this is limited by the number of simultaneous calls allowed and if the Call Waiting user service is assigned and active.

You can also double-click an incoming [unanswered] call to answer it, or to retrieve it if currently on hold.

8.3 Resizing the Current Call List

The bottom border of the Current Call List can be dragged down to display as many or as few calls as necessary. Unity will save these dimensions when closed. Unity can automatically resize itself to include all calls, as well as group waiting and queued [if applicable] calls together, as shown below.

8.4 Assigning an Account Code

Account codes can be assigned to a call through the Active Call Window as shown below, please note that Unity must place the call on hold in order to assign the account code, then will attempt to retrieve the call although this isn't always possible in which case the user must retrieve the call using the phone.

| | From | То | | | Du | ration | Status |
|-----|--|-----------------|---|----------------------------------|----|-----------|--------|
| | Natalie Maines (Salesforce Contact) | Jenna Wimshurst | _ | | 00 | 10 | Active |
| | | | | Assign call to account code | • | Company B | |
| | | | + | Add number to personal directory | | Company A | |
| | | | | Show CRM contact | | | |
| Cor | ntacts Call Logs Voicemail Abandoned Calls A | gent Activity | | Add CRM call log entry | | | |
| S | search Q | | 1 | Assign disposition code | • | | |
| | Nama | Dhone | | Reset column widths | | | |
| | Name | Phone | ~ | Show gridlines | | | |

Unity will display a notification to indicate that the call was successfully assigned to the account code.

9 DRAG AND DROP

Many common call handling actions can be performed with drag and drop, as well as right click and call control buttons.

9.1 Make a Call to a User or Number

Drag a user icon or a speed dial shortcut icon from the Contacts panel up into the Active Call Window to make a new call to the selected user or number.

9.2 Transferring a Call to a User

Drag a live call onto a user to either perform blind transfer, or to populate a drop list with call handling options. The drag and drop behaviour for this action is configured in Settings as shown below.

9.3 Make a Call to a Call Center Queue

When the supervisor is configured as an agent, drag a call center queue from the Personal Wallboard to the Active Call Window to make a call to that call center.

9.4 Transferring a Call to a Call Center Queue

If supervisor is configured as an agent, you can drag a current call in the Active Call Window up and drop it on a Call Center in the Personal Wallboard. This will blind transfer the call to the call center.

9.5 Send to Voicemail

Dragging an unanswered call from the Active Call Window onto the Voicemail button ⁽²²⁾ will blind transfer the incoming call to your voicemail.

9.6 Call Control

Dragging a call over the Hold/Retrieve, Answer/Release, Transfer or park buttons will perform that action on the selected call.

9.7 Send New Instant Message

Drag a user to the docked IM window to the right of the Contacts panel to send an IM to that user. This requires that the "Always show docked panel" field is ticked in Settings > Instant Messaging and Presence.

| Steve | Tutt: yes no problem | |

call

10 CONTACTS PANEL [BUSY LAMP FIELD]

The Contacts tab gives a visual indication of the status of users [within the group/enterprise] that are currently being monitoring. A maximum of 30 users can be displayed. Double clicking a monitored user will call them and right clicking will bring up a dynamic options menu.

10.1 Contact Panel Display Options

There are four different views available, as outlined below. Right-click anywhere in the Contacts panel and select Appearance list to change the view.

10.1.1 Details View

This view provides by far the greatest amount of detail, but requires more space [although the list can be shortened in which case scrollbars will automatically appear].

| Contacts Activity Logs Abandoned Calls | voicemaii Agent Activity | | 📀 My status: available in ol |
|--|--------------------------|-----------------------------|---|
| Search C | 2 | | |
| Vame | Phone | ACD State | Status |
| Ohris Tutt | 020828812 | Sign-Out | |
| Oindy Baker | 020828812 | | |
| Olin Wardle | 020828812 | Sign-Out | |
| 3 Dave Baker | 020828812 | Available | Talking to +447717580512 - 20:22 / In a meeting |
| David Higgins | 020828812 | Sign-In | |
| Dean Thompson | 020828812 | Sign-In | |
| 3 Ed Thrus | 020828812 | Sign-In | Currently away |
| 💈 Gopikrishnan V | 8332 | Available | |
| 💈 Iain Sin | 020828812 | Sign-Out | |
| Krysia Swiatek | 020828812 | Available | |
| 2 Lee Hous | 020828812 | Sign-In | |
| 2 Lewis Marcan | 020828812 | Available | Talking to Conference Bridge - 18:35 / Currently busy |
| Paul Farrant | 020828812 | Available | Talking to Alastair Brown - 02:00 |
| Steve Tutt | 020828812 | Unavailable - WebChat | |
| Steve Wardle | 020828812 | Unavailable - Comfort Break | In a meeting until 3pm |
| 💈 Vas Koria | 020828812 | Available | |

With this view the sort order for each column can be set, which is saved when Unity is closed. You can also configure Unity to display or hide the extension, department, ACD state and call duration columns.

| | Service Configuration | | Details |
|---|-----------------------|---|--------------------|
| | Copy number | | List |
| | Personal directory | | Small icon |
| ٠ | Manage user list | | Tile |
| | Appearance • |] | Show extension |
| | | - | Show department |
| | | ~ | Show ACD state |
| | | ~ | Show call duration |

10.1.2 List View

This option will display all users in a list.

10.1.3 Small Icon View

This view combines a simplified look and space reduction.

| Contacts Activity Lo | gs Abandoned Calls | Voicemail | Agent Activi |
|----------------------|--------------------|--------------------|--------------|
| Search | Q | | |
| Alastair Farrant | Amv Baker | Chorl | otte Houston |
| Dean Dewey | Ed Sinnott | Chan 8 Harry | |

| 🛚 Krysia Quartly | 📀 Lee Koria | 🥑 lain Marcantonio | |
| 🕑 Vas Dadds | 🥑 David Thompson | Steve | Wardle |
| | | | |

10.1.4 Tile View

This view is similar to Icon view but uses more white space to provide a cleaner look.

| Contacts A | Activity Logs | Abandoned Calls | Voicemail Agent Activity | | | 🥝 My status: available in office |
|-------------|---------------|-----------------|--------------------------|--------------------|------------------|----------------------------------|
| Search | | Q | | | | |
| OAlastair F | arrant (| Amy Baker | 🤣 Charlotte Houston | Chris Tutt | 🕝 Cindy Higgins | 📀 Colin Earl |
| 🕗 Dean De | wey 🤇 | Ed Sinnott | 🙁 Harry Brown | 🥏 lain Marcantonio | 🔕 Krysia Quartly | 📀 Lee Koria |
| 🛛 Lewis Sw | iatek (| Paul Thrussell | 📀 Steve Tutt | 📀 Steve Wardle | 🕑 Vas Dadds | 📀 David Thompson |

In both the Icon and Tile views, hovering the mouse over the image will provide more information about the monitored user, for example their service configuration:

10.2 User Icons

There are four main user icons states shown in the Contacts panel, regardless of the view chosen.

| 0 | Available | The monitored user extension is on hook |
|---|----------------|--|
| 2 | Ringing | The monitored user extension is ringing |
| 8 | Engaged | The user is on the phone |
| • | Do Not Disturb | The user has selected DND or Unavailable profile |

10.2.1 User Icon Engaged Tool Tip

Hovering your mouse over an engaged or DND icon will reveal more information about their current state, if available. For engaged users this will include the name or number of the party

they are engaged to and the duration off the current call as below [this feature can be disable for privacy reasons].

Paul Brown Talking to +4475344 (Partner Support) - 08:45

10.2.2 Instant Messaging Availability

Regardless of a user's Available/Ringing/Engaged/DND state, if they currently have any version of Unity open they will be available for instant messaging. This is shown by the envelope at bottom right of the user icon, as per the following examples.

| 20 | Ringing. Unity open and available for IM |
|----|--|
| ο. | DND/Unavailable profile. Unity open and available for IM |
| 8. | Engaged. Unity open and available for IM |
| 0 | Available/on-hook. Unity open and available for IM |

10.3 Managing Monitored Users in the Contacts Panel

The Contacts panel will display 30 users. In the Contacts panel right click anywhere and click "Manage user list". This will allow you to choose which users to display.

You will then be able to move users or departments between the lists either by double-clicking them or using the arrow button. All users in the right-side list will be monitored in the Contacts panel. This list is saved when Unity is closed.

The box at top left will dynamically search the group directory.

10.5 Performing Call Control Actions in the Contacts Panel

There are many call control functions that can be performed by right-clicking a monitored user in the main Contacts panel or Search. The menu options displayed will dynamically change to only show those available depending on the state of the monitored user and/or the state of the selected call in the Active Call Window [if there is one]. For example, "Transfer to voicemail" will not be available if the user does not have the voicemail service assigned and "Camp call on extension" will not be available unless there is a live call selected in the Active Call Window.

10.5.1 Call Extension

Selecting "Call extension" will open a new call to that user in the same way that double clicking the user icon would. Any current call will automatically be placed on hold. This can be used to make an announced transfer as opposed to a blind transfer using the "Transfer call" commands further down the menu.

10.5.2 Answer This Call [Call Pick-Up]

This will perform call pick-up and will pull the call to the ringing Supervisor user.

Feature Dependency:

- I. Monitored user must be ringing [orange icon]
- II. Supervisor and monitored users must be in the same pick-up group

10.5.3 Park Call on Extension

Will park the call on the monitored user's extension park slot.

Feature Dependency

I. Must have a live call

10.5.3.1 Retrieving Parked Calls

Once a call has been parked onto a user's extension, their Unity will display a "P" and a toast pop up window will appear. In order for the user to retrieve the parked call they simply need to click either the Pickup button or the toast pop up. If the call is not retrieved it will be redirected back to the original user who parked the call.

10.5.4 Camp Call on Extension

Will camp the call onto the engaged monitored user. When the user goes back on-hook the camped call will be delivered and their phone will start ringing. If the user does not go back on-hook before the camp timer expires the call will return to the Supervisor user.

Feature Dependency

- I. Must have a live call in the Active Call Window
- II. Must be enabled in Settings > Call Transfer as below

The Camp Call option will only be available if activated in Settings > Call Control > Call Transfer as below.

10.5.6 Call Mobile

Places call to mobile. Any live call placed on hold.

Feature Dependency:

The monitored user must have their mobile number entered in BWKS

10.5.7 Transfer Call to Mobile

Performs blind transfer call to monitored users mobile.

Feature Dependency:

- I. The destination user must have their mobile number entered in BWKS
- II. Must have a live call

10.5.8 Transfer Call to VoiceMail

Performs blind transfer to the destination user's voicemail.

Feature Dependency:

- I. The destination user must have voicemail service assigned
- II. Must have a live call

10.5.10 Barge into This Call

Makes an immediate three-way conference call with the Supervisor user, the monitored user and the third party the monitored user is talking to. All parties will be able to talk and hear each other. When attempting to barge into a call, if the phone plays a "number doesn't exist" tone then this means the monitored user cannot be barged into, because they have the Barge-In Exempt service assigned and activated. Only users without this service active can be barged into.

The Active Call Window will display like a normal conference call, as below, and the Supervisor user can Hold/Retrieve the same as for a conference call.

| | From | То | Duration | Status |
|-----|-----------------|-----------------|----------|-----------------------------------|
| 523 | Sasha Gorb | Jenna Wimshurst | 00:15 | Active (conference)/Not recording |
| 523 | Jenna Wimshurst | 01268508018 | 00:02 | Active (conference)/Not recording |

Please note that when leaving a call that you barged into, you must transfer the call parties together in order to leave the conference without ending the original call. To do this either drag

one call on top of the other in the Active Call List, or press Transfer ^(C) then select the option to leave the conference, as shown below.

Feature Dependency:

- I. The Supervisor user must have directed call pick-up with barge-in service assigned
- II. Monitored user must be engaged on a call
- III. The monitored user must not have the barge in Exempt service active

10.5.10 Call Extension When Available

Places an alert on the engaged monitored user. When they become free a dialogue box prompts the Supervisor user and allows them to open the call back.

| Unity | | \times |
|-------|--|----------|
| ? | Harry Dadds is now available, would you like to call this extension? If you click 'no' you will not be prompted to call again. | |
| | <u>Y</u> es <u>N</u> o | |

Feature Dependency:

I. Monitored user must be engaged on a call

10.5.11 View User Details

Performs a lookup on the user's details as entered in BWKS. This includes their phone number, mobile and email address.

| Steve Wardle | × |
|--------------|-------------------------------|
| Title: | |
| Email: | steve.wardle@kakaposystems.co |
| Phone: | 02082881245 |
| Mobile: | |
| WAV File: | |
| | ✓ ОК |

10.5.11.1 Adding Audio Alerts to Monitored Users

The "View user details" box also allows a wav file to be specified that will be played when the monitored user receives a call. Click the 📮 icon to select the wav file then click OK. This feature

is useful in Manager/Secretary scenarios where the Supervisor user is screening calls. When the audio alert plays that is the reminder for the user to perform call pick-up.

10.5.12 Send Email

This will open a new email window in the default Email application. The user must have the email filed populated against their name in BWKS.

Feature Dependency:

I. The recipient user must have their email address entered in the system

10.5.13 Answer This Call [Call Pick-Up]

When monitored users are ringing their icon in Contacts becomes orange . To perform pick-up and answer the call right click the icon and select "Answer this call". This option is only displayed when right clicking a ringing user.

Feature Dependency:

I. The Supervisor user and the monitored user must be the same pickup group or the Supervisor user must have the "Directed Call Pick-Up" service assigned.

11 INSTANT MESSAGING

Instant messages can be sent and received between any Unity app [Reception, Desktop, Agent, or Supervisor]. Messages sent to offline user [those that do not have an instance of Unity open] can be stored and delivered when the recipient next opens Unity.

11.1 Online/Offline Indicator

A person that is running an instance of Unity, and therefore available to send an online IM to is indicated with a small envelope on their user icon. This applies across all the available, engaged, ringing and DND states as shown below.

| State | Online [Unity Open] | Offline [Unity Closed] |
|-------------------------|---------------------|------------------------|
| Available | Ø. | 0 |
| Ringing | <u>></u> • | 2 |
| Engaged | 8. | 8 |
| DND/unavailable profile | Θ. | • |

11.2 Docking the IM Window

Instant Messages can be displayed in the Docked IM Window or as separate dialogue boxes for each individual IM thread. If the docked window is used IMs can be initiated via drag and drop and new IM windows will not pop over other applications.

Docking the IM window is specified in Settings > Settings > Instant Messaging and Presence > "Show instant messages in docked panel". Individual IM messages can still be undocked and redocked as required.

11.3 Undocking and Redocking IM sessions

You can undock an IM message by clicking the 📥 "Expand conversation to separate window" button. The IM session will now be a standalone window.

Docked IM

| - | |

| Steve Wardle: yep Jenna Wimshurst: sweet thanks Steve Wardle: its parking | | | | | ^ |
| Γ | | | | | ~ |
| Last message received at 10:48 | | • | × | ¢ | P |

11.4 Sending an Instant Message

Send an instant message either by right clicking a user icon in Contacts panel or Search and selecting "Instant Message" from the drop list, or by dragging a user icon into the docked IM panel. Alternatively, you can select Messaging > Start Conversation from the top menu bar.

You can then select the users to include in the IM conversation. Please note that only online users will be displayed in the lists. The left list contains all online users, to include them in the IM conversation move them into the right list either by double-clicking the entry or using the arrow button.

| Conversation members | × |
|---|---|
| Peter Law Prathap MK Sally Jones Subha T Tracey Scoates Vas Koria | ← Communications Limited Abin Joseph Steve Tutt Steve Wardle |
| Show hierarchy | × Cancel ✓ OK |

11.5 Overview of IM Window

The upper part of the IM window will scroll to display the most recent comment. Type your comment in the bottom window and press Enter or click the 😐 envelope at bottom right.

IM Window - Docked

IM Window – Undocked

11.6 Adding Participants to an Existing IM Session

When an IM conversation is in the Docked IM panel you can drag a user icon from the Contacts Panel or Search and drop them on the IM window to add them to the conversation. When the IM Window is undocked you click the Search icon and select participants to add to the conversation, as below.

| Conversation members | × |
|--|---|
| Peter Law Prathap MK Sally Jones Subha T Orracey Scoates Vas Koria | Communications Limited Abin Joseph Steve Tutt Steve Wardle |
| Show hierarchy | × Cancel ✓ OK |

11.7 Sending Contact Directory Numbers

To send another user a number from your Directory right click in the bottom panel where you enter text. Mouse over to see your Directory entries and select the appropriate number.

Feature Dependency:

- II. The recipient user must have their email address entered in the system
- III. The Supervisor user must have their outlook client open and they must have full sharing Permissions to see the monitored user's Calendar in Outlook

11.8 IM Notification Settings

All notification options for IMs, including sound and popup notifications can be found in the settings under Instant messaging & Presence.

| 0 Services & Settings X |
|--|
| Services Settings |
| Services Settings • Appearance • Skin • Contact Search • Configuration • Dalling Rule • Coutbook Integration • Outbook Integration • Configuration • Call Notification • Call Notification • Call Notification • Call Notification • Cubic Keys • Cuck Keys • Cuck Keys • Cuck Keys • Cuck Keys • Show popup notification • Show popup notif |
| Commands Commands Startup Update Instante Messaging & Presence Instante Messaging & Presence Change Password Change Password Security Language Connecton Network Proxy Canded Centers V |

Selecting the 'Show popup notification until closed' will keep the IM popup on the screen until it has been closed or clicked.

11.9 Send IMs to Offline Users

Even when a user is offline, Unity will allow you to send them an instant message which will then be queued and will appear the next time the user is online.

11.9.1 Logging IM Sessions

You will find the Instant Messaging and presence logging options in the Settings tab. Here you will be able to configure how IMs are saved, what file type they are (CSV or HTML) and where they are saved, for example, you may want to save IM conversations on your server rather than on the supervisor's local computer.

| vices Settings | |

Cug instant message conversations Create a new file for each conversation Create a new file every day Always use the same file Log file type HTML Log Folder C.\Program Files (x86)\Unity Clent\Instant Message Log\ |

11.11 XMPP Integration

Unity provides seamless integration with XMPP in order for Unity users to share instant messaging and presence (IM&P) functionality with UC-One clients. All instant messages are displayed and managed to the user as a docked or undocked IM conversation, regardless of the

IM&P platform being used. Only online users in Unity can participate in group chats, group chat is not currently supported with XMPP.

11.11.1 XMPP Authentication

Unity is unable to extract the XMPP password from the VoIP platform, meaning it must be reset from within Unity. This functionality relies on the Integrated IM&P service being assigned to the receptionist, although no other UC-One related service need be assigned.

In order to set the XMPP password go into Settings and click on the "XMPP > Change Password" item as shown below. You can see the current XMPP status is offline.

| Services & Settings X Services Settings | | Services & Settings Services Settings | |
|---|---------------|---|---------------|
| | | | |
| | × Cancel ✓ OK | | × Cancel ✓ OK |

Once the password has been entered you must click the OK button to save the password, before moving to any other panels in settings. Please note that the XMPP password <u>should not</u> be the same as the password used to first log into Unity. You will be notified once the password has been changed and the XMPP status changed to online, as shown below.

| XMPP Login Details | |
|---|--|
| Status | |
| Online | |
| Login ID | |
| 442082881248@voice2000.eu.bc.im | |
| Password | |
| ******* | × |
| Automatically accept subscription requests | |
| Automatically send subscription requests | Unity |
| When a contact is online in Unity IM&P and XMPP | |
| Use Unity IM&P | The password was changed successfully. |
| | ОК |
| | |

11.11.2 Managing XMPP Subscriptions

To subscribe to XMPP presence for a monitored user (meaning the receptionist will receive realtime updates as the monitored user changes their presence in UC-One) simply right-click the user and select "Add XMPP presence", as shown here. If already subscribed, then right-click the user to remove XMPP presence.

Unity will show the unavailable, busy etc status of the user, as well as any status message manually entered in UC-One, as illustrated below.

Please note that at present XMPP is only used by Unity to communicate with UC-One clients.

Unity can be configured to automatically subscribe to all monitored user's XMPP presence, as shown here. However, this may result in the buddy/contact list in UC-One becoming very large so should only be activated if the receptionist doesn't often refer to the buddy list.

Unity can also be configured to automatically accept subscription requests from other users, if this setting is not activated then whenever a user subscribes to the receptionists XMPP presence a prompt will be displayed, as below.

Unity can be configured to automatically generate an XMPP password the first time it is loaded, this is a branding property that is set in the Unity Client branding portal. In this case Unity will save the randomly generated password in Broadworks and also in the registry, from where it will be used whenever Unity is next started. When the password is reset in Broadworks it will automatically be updated in the device configuration file for UC-One, if in use. Furthermore, if UC-One is currently in use this will not impact the existing XMPP registration, therefore there is no impact on UC-One.

11.11.3 Instant Message Priority

Because a monitored user could be running Unity and UC-One, that user could be available to receive instant messages using either client, or both. In these situations, Unity can be configured to prioritise one IM platform over the other, as shown below.

Options are to only send the instant message using only Unity IM&P meaning the instant message will not be received by UC-One, to only send using XMPP meaning the monitored user's Unity client will not receive the message, or to send through both messaging protocols meaning both clients will receive any instant messages sent from Unity. The last option is the default and is recommended in most scenarios.

11.11.4 Configuration

12 PERSONAL DIRECTORY

The Personal Directory is a repository on BroadWorks for each user to store personal speed dials. Using this feature in Unity will populate the directory on the host BroadWorks platform. Once numbers have been entered they are available in the Search panel or can be pinned to the

main Contacts Panel. A Personal Directory entry is shown by a <u>s</u> icon. Double clicking the icon will make a call to the Directory number. The Personal Directory menu is available when right clicking a monitored user or in the Contacts panel.

Personal Directory – Right click in Contacts

12.1 Add New Entry

Enter the Name and Number and click Ok

| Add Personal Directory Entry X | | | |
|--------------------------------|-------------|--|--|
| Name | Derek Lynch | | |
| Phone | 07976 | | |
| × Cancel ✓ OK | | | |

If the number specified is already in the Directory the user will be alerted as below.

12.2 Edit Entry

Use the Search field in Contacts to locate the entry. You can search by either Name or Number. Right click the Entry and select "Edit".

| C Derek Lynch | _ | | | | |
|---------------|---|---------------------------|---|---|--------------------|
| | C | Call number | | | |
| | | Add to contact group | • | | |
| | × | Remove from contact group | + | | |
| | + | Add to default list | | | |
| | | Copy number | | | |
| | | Personal directory | • | | Edit Derek Lynch |
| | ۰ | Manage user list | | × | Remove Derek Lynch |
| | | Appearance | • | + | Add new entry |
| | | | | 1 | Import directory |
| | | | | | Export directory |

12.3 Remove Entry

Use the Search field in Contacts to locate the entry. You can search by either Name or Number. Right click the Entry and select "Remove".

| Cerek Lynch | ر × + | Call number Add to contact group Remove from contact group Add to default list Copy number | • | | |
|-------------|-------------|--|---|---|--------------------|
| | | Personal directory | • | | Edit Derek Lynch |
| | ۰ | Manage user list | | × | Remove Derek Lynch |
| | | Appearance | • | + | Add new entry |
| | | | | | Import directory |
| | | | | | Export directory |

12.4 Dialling Directory Entry

Locate the entry either on the Contacts panel or Search. Drag the entry into the Active Call Window or double click to make a call, or right click the entry and click "Call number".

12.5 Import Personal Directory

Supervisor will allow the user to import a .csv file of directory entries, provided they are in "name, number" format. Right click in the Contacts panel, select "Personal directory > "Import" and then browse to the location of the csv.

| | Personal directory | • | + | Add new entry |
|---|--------------------|---|---|------------------|
| ٠ | Manage user list | | | Import directory |
| | Appearance | • | | Export directory |

12.6 Export Personal Directory

To export Personal Directory entries right click in Contacts and select Personal directory > "export". You will be prompted to save the file locally. The format is csv and the default file name is PersonalDirectory.csv

| | Personal directory | • | + | Add new entry |
|---|--------------------|---|---|------------------|
| ٥ | Manage user list | | | Import directory |
| | Appearance | ► | | Export directory |

Choose save location on local PC. The format of the csv is Name and then Number. Note the example below is edited for privacy.

13 CONTACT SEARCH DIRECTORIES

The Contact Search field combines all BroadWorks and Outlook Contacts directories to create a central search repository. The BroadWorks directories include the Common Phone List [system speed dials], the receptions user's own Personal Directory entries, and the Group Directory which includes all the other users in the group as well as hunt groups, auto attendants and call centers. Unity can also integrate with third party LDAP [including Microsoft Active Directory] and SQL directories as well as integrating with CRM systems.

Please see your Administrator for a separate guide on using CRM integration.

| Directory | Directory Type | Entry Type |
|-------------|----------------------------|--|
| Owner | | |
| BroadSoft | Group Directory | All other users for BLF presence as well as hunt |
| | | groups and auto attendants |
| BroadSoft | Common Phone List | Speed dials entries at the Group level |
| BroadSoft | Personal Directory | The user's own personal speed dial entries |
| Outlook | Personal Contacts [private | The user's own Outlook Contacts |
| | folder] | |
| Outlook | Group Contacts [public | The shared Outlook Contacts at the Outlook |
| | folder] | group level |
| Third Party | SQL | External SQL Directory |
| Third Party | LDAP | External LDAP Directory |

13.1 Loading Directories

Unity will load all directory entries into Contact Search on start. If users are added to the BroadWorks Group Directory while Unity is running, they will not be visible until Unity has restarted. Personal directory entries the user adds will be available to use immediately without restarting.

13.2 Contact Search Results Layout

To perform a search type characters or numbers in the Search field and Supervisor will start dynamically populating a list of matching entries across all directories. The list will narrow as more characters or numbers are entered. Clearing the Search box and returning to the main Contacts panel can be achieved by clicking again in the Search filed [provided "Clear the search box when activated" is enabled in Settings as outlined in the section below.

Search results will display each number for a contact as a separate line. Drag or double click the entry to make a call or right click to select a call action from the context menu.

cicons represent external numbers or system resources such as hunt groups for which presence information cannot be displayed.

It is also possible to search on department name to list all users of matching departments.

13.3 Contact Search Settings

Preferences for Search can be configured in Settings > Unity Settings > Contact Search. The order of search results can also be changed to display internal extension users first and the "Include department name in search" as shown above, can be toggled.

13.3.1 Listing Directories

Right-click the search box in the Contact list to view all directories available in Unity, then select the directory to load those contacts in the list, as below.

| Contacts Call Logs (1 Miss | ed) Voicemail | |
|----------------------------|------------------------|------------------|
| Search | Communications Limited | Entire directory |
| Name | Common phone list | Helpdesk |
| | Personal directory | Sales Team |
| | Outlook contacts | Technical |
| | | ed test |
| | | Kakapo |

13.4 Configuring Outlook Contacts Preferences

The Outlook directories are both public and private folders and is configurable in Settings > Outlook Integration as below.

| Services & Settings | |
|---|--|
| ervices Settings | |
| - Unity Settings - Appearance - Skin - Contact Search - Contact Display | Specify which Outlook contact folders are to be imported (only Outlook 2003 or later is supported Choosing to include public folders may increase the time taken to load. |
| Current Calls | Load contacts from public folders Load contacts from my private folders |
| Custom Directory Integration Configuration Outlook Integration | Use Outlook caching for greater speed Include business name in directory list |

13.5 Third Party Directories

When searching BroadWorks and Outlook directories, Unity will dynamically match entries as keys are typed. For third party LDAP and SQL directories, because these are not loaded into Unity but polled each time a search request is made, search results are not listed until the Supervisor user has entered three characters and hit enter or clicked Search . Unity includes a wizard to connect to third party SQL and LDAP directories. Go to Settings to add, edit and remove custom directories, as shown below.

| vices Settings | | | |

| | | | |

13.6 Desktop Integration

Go into Settings > Settings tab > Desktop Integration, as below.

| U Services & Settings | | × |
|---|--|---|
| Services Settings | | |
| Appearance Skin Contact Search Contact Search Contact Display Current Calls Computer/Phone Integration Dialing Rule Confouration Confouration Confouration Confouration Confouration Confouration Contract To Dal Ceals Conversation Cals Conversation Unty Connect Outk Keys | Configure Unity to integrate with third party applications through a shared file or the clipboard. Copy remote number to clipboard Write remote number to file Path Use remote number as file name Use static file name Name Call.txt | |

Unity must be configured with the folder location where the file is to be written, you can also specify whether to use the remote number as the filename (for example 02082881248.txt) or to include the remote number in a text file with whatever naming convention you require. Lastly you should instruct Unity when to create the file, for example only when receiving [call center] calls. Please note that Unity will only create the file for an inbound call when the user has answered it.

When you click OK to save, Unity will attempt to create a file called test.txt in the specified folder, then to delete it, which is to test that appropriate folder permissions have been applied. If this fails, Unity will alert the user and the settings will not be saved.

14 CALL LOGS

The Call Logs tab displays Missed, Received and Dialled Calls with a date and time stamp showing the most recent call at the top. Up to 20 numbers are listed unless the Enhanced Call logs service is assigned to the Supervisor user in BroadWorks. Calls to the Supervisor user DID as well as hunt group and call center calls that have reached the Supervisor user are shown.

| Contacts Call Logs Voicemail Abandoned Calls | | |
|---|--------------|--------------|
| Missed calls O Received calls O Dialled calls | | |
| Call Date | Phone Number | Name |
| 11/08/2016 16:01:38 | 1248 | Chris Tutt |
| 11/08/2016 12:37:31 | 0139: | 01392 |
| 08/08/2016 16:30:58 | 0208 | 02086 |
| 07/08/2016 18:34:40 | 0002 | Andrew Smith |
| 07/08/2016 18:34:20 | 0002 | Andrew Smith |

Drag or double click an entry to make a call to that number. Call logs can be exported as a csv file, either individually or together, but clicked the Export button.

15 MY STATUS

The "My Status" link provides an indication of the current status of the user as well as quick access to key services that are regularly modified. Unity will only display the options for the services that have been assigned to the user, available services are CommPilot Express (CPE), Do Not Disturb (DND), Call Forward Always (CFA), Remote Office and Hoteling Guest (for hot-desk environments).

CommPilot profiles are also used to convey presence information to other users within the group or enterprise. As users change their CommPilot Express state, any Unity client that is monitoring that user [through the User Status list] will see their image change, as outlined below.

| User State | Description | User Status Image |
|--------------------------|---|-------------------|
| Available: In Office | I am in the office and available to receive calls. | 0 |
| Available: Out Of Office | I am not in the office but am available to take calls | 0 |
| Busy | I am currently busy (short term) | 0 |
| Unavailable | I am currently unavailable (longer term) | • |
| None | No call routing plan is in use | |

15.1 Configuring CommPilot Express States

CommPilot Express allows the user to specify how inbound calls are to be handled. Once the four different profiles (above) have been configured in Settings, the profile in use can quickly be changed through the My Status link. Unity can also be configured to automatically apply a CommPilot Express profile when starting or closing, as below.

| ervices Settings | |
|---|---|
| Incoming Calls Anonymous Call Rejection Call Forward Always Call Forward Busy Call Forward No Answer | CommPilot Express allows you to pre-configure four profiles to control your inbound calls. These profiles can quickly be changed through Unity when you leave your desk or are at a remote location |

15.1.1 Available: In Office

This is the profile to use when you are working from the desk where you phone is located; it should represent "normal" routing rules.

15.1.2 Available: Out Of Office

This is the profile to use when you are away from your desk for an extended period, but still available for receive calls. Examples are when in a meeting or when travelling.

15.1.3 Busy

This is the profile to use when you are temporarily unavailable to take calls, for example when in a meeting where you don't want to be disturbed.

| ivert all calls to But forward cal | | | | | |

15.2 Do Not Disturb

To activate Do Not Disturb, click on the My Status link and click the menu option. The My Status link will change to indicate the service activation, as will the Unity title bar.

| My status: available | | | | | | |
|----------------------|------------|--------------------------|--|--|--|--|
| | \bigcirc | Available: in office | | | | |
| | 0 | Available: out of office | | | | |
| | 0 | Busy | | | | |
| | Θ | Unavailable | | | | |
| | 0 | None | | | | |
| | • | Do not disturb | | | | |
| | 6 | Call forward always | | | | |
| | e | Connect to a device | | | | |
| | C→ | Remote Office | | | | |

Anyone monitoring the user [in the Contacts list] will also see that they currently have Do Not Disturb activated.

15.3 Call Forward Always

| Ø My status: availab | le in (| office | | | |
|----------------------|---------|--------------------------|---|--|-----------|
| | 0 | Available: in office | | | |
| | 0 | Available: out of office | | | |
| | 0 | Busy | | | |

| | 0 | None | | | |
| | • | Do not disturb | | | |
| | 6 | Call forward always | • | Image: A second s | Activate |
| | e | Connect to a device | • | ٥ | Configure |
| | G→ | Remote Office | × | | |

Use the My Status link to quickly activate/deactivate the service, or click configure to go directly to that. service in Settings

15.4 Remote Office

Use the My Status link to quickly activate/deactivate the service, or click configure to go directly to that service in Settings.

Unity can also be configured to automatically activate and deactivate Remote Office on start-up and shutdown. If Unity is not configured to automatically deactivate when closing a prompt will be presented to the user, as shown below.

| Incoming Cals Incoming Cals Incoming Cals Anonymous Cal Rejection Cal Forward Always Cal Forward No Answer Cal Forward No Answer Cal Center Anopymous Cal Cente | usiness phone and control it through |
|---|--------------------------------------|
| | |

15.5 Hot-Desk and Flexible seating

Hoteling Guest allows the user to connect to a device, typically in a hot-desk and flexible seating environment. To attach the user account to a device, select the device from the menu option below. Please note that only available devices [that aren't already in use] will be displayed.

There is no visual notification that the user account is attached to a device, other than if the user clicks in the My Status link, in which case they will see the device is ticked.

| | | | Available: in office |
|---|------------------------------------|----|--------------------------|
| | | 0 | Available: out of office |
| | | 0 | Busy |
| | | 8 | Unavailable |
| | | 0 | None |
| ~ | Flex - 9114 | • | Do not disturb |
| | Flexible Seating Guest Flex - 9110 | 2 | Call forward always |
| | Flexible Seating Guest Flex - 9114 | せ | Connect to a device |
| | Flexible Seating Guest Flex - 9115 | E. | Remote Office |
| | Flexible Seating Guest Flex - 9116 | 67 | Remote Office |
| | Flexible Seating Guest Flex - 9118 | | |

When Unity is closing, it will prompt the user to remove the device attachment.

If the user clicks no they will continue to be attached to the device until the association is automatically ceased by the BroadSoft.
